REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art of record, especially Shigeta et al, discloses or suggests a liquid crystal panel or a method of manufacturing a LC panel wherein each of the alignment films comprises: a first deposited layer formed of deposited molecules of an inorganic material by oblique deposition, the liquid crystal molecules being aligned perpendicular to the orientation of the deposited molecules of the first deposited layer, and a second deposited layer formed of deposited molecules of an inorganic material by oblique deposition, the liquid crystal molecules being aligned parallel to the orientation of the deposited molecules of the second deposited layer, and wherein the second deposited layer *is approximately 0.25-1.25% the thickness of the first layer*, and is stacked on top of the first deposited layer such that the deposited molecules of the first deposited layer are aligned substantially perpendicular to the orientation of the deposited molecules of the second deposited layer; and wherein *the alignment layers provide a pre-tilt angle of the liquid crystal molecules relative to the substrate of approximately 5° – 12°* . Also, see Applicant's remarks regarding the critical ratio between the thickness of the first layer and that of the second layer for providing the desired pre-tilt angle of 5° – 12° .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
